	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-26</u>	YES

Claims 1-26 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a device for tilting chairs, including the details of the actuation device as set forth in the claim, in particular the rocker arm that comprises a lever arm and which swings around a fulcrum and which is elastically deformable due to operation of the control knob, such that the accumulation of the elastic deformation energy in the rocker arm moves the return arm upon the decrease of opposing forces.
